

Ring Size Guide

Allumine rings are available in sizes K, L, N, O $\frac{1}{2}$, Q & R $\frac{1}{2}$.

To ensure an accurate fit for your new Allumine ring, use the below guide along with an existing ring which fits the intended finger, to find out your ring size. For greatest accuracy you should use a ring with a similar band width and style to that you want to buy.

1. Print this document out on an A4 piece of paper to 100%, do not 'scale to fit page'. You can check that this has been printed to size by measuring the line below. It should be exactly 5cm.

2. Place your ring on the chart below and match the inside edge of the ring to the circle nearest in size.
3. The letter that fits best within the circle, is your ring size.

If your measurements fall between two sizes we recommend that you buy the larger size.
